

H.O. Wolding Chooses Precision Pulmonary Diagnostics LLC

Amherst WI based truckload fleet set to begin initial testing of drivers using PPD's integrated sleep apnea services.

Houston, TX – August 1, 2009 – Precision Pulmonary Diagnostics (PPD) creators of the only successful integrated sleep apnea screening and treatment program targeting the commercial vehicle industry, today announces that Amherst WI based H.O. Wolding Inc. has chosen PPD as its comprehensive sleep apnea provider. A 2007 project, funded by the FMCSA, entitled “Advanced Driver Fatigue Research” has cited research showing that sleep disorders, such as sleep apnea, are at higher risk for crashes. The PPD sleep apnea program, which is now patent pending, is aimed at identifying drivers with a high probability of sleep apnea and providing treatment, leading to improved driver health, and enhanced highway safety.

H.O. Wolding Inc. after conducting an extensive review of alternative sleep apnea detection and treatment program providers, PPD will begin screening H.O. Wolding Inc drivers using risk factors pointing to a higher probability of sleep apnea.

“The safety and health” of H.O.Wolding drivers is of utmost importance to us” says Terry Littleton, Safety Director with H.O. Wolding Inc.

Founded in 1934, H.O. Wolding Transportation operates 300+ trucks nationwide.

“PPD will use its expanding network of accredited sleep centers to service the needs of H.O. Wolding Inc. and its drivers” said Dr. Berger. “ PPD has the only operational network of sleep centers specially trained to serve the commercial driver population. All of the resources of our unique and effective sleep apnea detection and treatment program will be made available to help achieve the objective of ensuring that drivers receive appropriate treatment in a timely manner. We are very proud to have been chosen to provide this service to H.O. Wolding, Inc. and look forward to meeting their needs.”

About Precision Pulmonary Diagnostics

Founded in 2005 by sleep specialist, Mark B. Berger, M.D., Precision Pulmonary Diagnostics (PPD) is committed to the diagnosis and treatment of sleep apnea in commercial drivers/operators, resulting in improved driver health and safety and significant return on investment for their employer.

Headquartered in Houston, TX PPD's patent-pending programs allow administration of employer-driven sleep apnea programs that include web-based screening tools, diagnosis, treatment and monitoring of this highly prevalent condition. For more information go to: wwwppdsleep.com
